

NOTICE

In 1981, Three Japanese students of Hitotsubashi University Alpine Club (HUAC) went missing when climbing on the south east ridge of **Mt.White Sail**. It seems that they have fallen into either White Sail glacier or Tos glacier by accident. They are still missing.

Now that more than 30 years have past, we are expecting that it is about time when they could be found in the Glacier.

Please inform us if you find something presumed to be their remains or belongings. We would also deeply appreciate it if you would give us any relevant information.

Thank you for your cooperation
